

THE ORGANIZER

The Organizer app helps the users to effectively utilize their precious time and also helps them in scheduling their journey in a better way.

The organizer app asks the user to select their favored locations from the list of tourist places described by the app. The app also asks the user the timespan of their entire journey. The app then produce a chronological chart for the user which routes the user to selected locations. The scheduling of the locations by the app will be done in such a way that the user doesn't miss the important festival or events on these locations. The user will be directed to these locations based on bus, boat services (available with govt. of Kerala) and the train services available.

Once the chart has been produced user will be given the option to extend or reduce the time on a particular location, accordingly the re-routing will be done. The app can also suggest the location of stay for the user based on the hotels or accommodation facility available with Kerala tourism department.

The organizer app is an online app which works with the database having the buss, boat and train timings at different tourist spots in Kerala. Database also contains the dates of major events and festivals at these locations.

The ease of scheduling can attract more tourists thus contributing a rise in revenue to the Kerala tourism department.
