

LEAVSING:

LEAVSING is new app idea to identify the plant, birds and animals. The app will be very helpful to tourists and others, who didn't know the names a specific animal, bird, plant, if it will be realized. The basic concept is that the shape of every leaves, animals and colours are different. using this app the user will take the photo with the help of app and the app will understand the shape, size or colour and display some options to the user, and he/can identify one of them and he/she could get full information about that bird ,animal, and plant.
