

Refresh everyday @ God's own country.

My idea is to develop an app with information all attractions in Kerala to attract tourists to Kerala and thus make some economical benefits to Tourism Department of Kerala. The list below contains information to be added in the app to improve or promote tourism in Kerala.

- **List of attractions** – District wise and category wise. For example Backwater tourism, Monsoon tourism, Ayurvedic tourism Hill stations, Zoo, Museums etc.
- **Info of Destination**
 - Distance from major Airports, Railway station and Bus stations and timing of public transport.
 - Nearest accommodations:
 - Include private hotels in the app based on paid subscription: If a tourist book stays at the registered hotel, an amount should go to tourism department as commission.
 - Weather forecasts and peculiarities of the destination in each season and best time to visit.
 - Important festivals and timing and Information for major shopping destination near to the destination
 - Important contact information like nearest hospital, police.
 - Provide photos or video Gallery of the destination, festivals, latest events etc.
 - Provision to write reviews and rate the facilities.
 - Subscribe for latest news, festival information and weather information etc.
- **Tourist registration:** Promotion for tourist registered through this app. Tourist Dept. can get statistics of tourists visited kerala.
- **Book flight + Stay:** Provide option for booking flight + hotels through this app. If Tourism Dept. can make tie-up with major airlines and provide some promotions/offers for tourists who books tickets through this app.
- **Reward Programs:** Reward programs for using Tourism Dept. facilities through this app and provide discounts for next visit.
- **Share** the experience to major social networking sites like facebook, twitter etc.
- **Purchase City/Tourist Pass:** Provide option for purchasing pass for individual/group for stay, visit etc.
