

An app that will primarily function as a navigator/travel guide for the tourists.

- The app will fetch the real time location details of the tourists and would provide basic details of that location to them.
- The app will also provide suggestions specific to that location - any local cuisine, local art forms or seasonal attractions etc.. This will help the tourists to make the best of their stay in Kerala.
- The app will help tourists to get local assistance for travel, lodging etc.. They will also have an option to rate or recommend these options.
- When the tourist group is large and do not move together, they can use the app to keep track of each member.
- App will include local map. – showing places around them with more details.
- The KTDC/Local tourism authorities will be notified when a tourist enters their jurisdiction.
- The app will ensure complete security for the tourists and help them to stay away from trouble – giving as much of the local details as possible.
