

Tour the Kerala

Tour the Kerala is the mobile application such as android app or Windows app which will be used by the tourist wanted to visit the Kerala.

We will look it from different perspective. The app should contain the following things

1. From Tourists perspective:

i. **Places of Interest (top attractions):**

This module of app should contain the names of places which is visited mostly by tourists. There should provision to rate the places by tourists.

ii. **Weather Information:**

App should contain the information about Weather information like temperature, humidity of particular place, rain condition near the place, other information such as chances of cyclone etc...

This weather information should be updated regularly.

iii. **Banking Facilities & Currency exchange centers :**

For tourists from foreign countries and other states.

iv. **Modes of transfer between different places & Visuals of different tours:**

Visual effect on app for short time like near about 1 minute which will cover path of travel, Major cities on route which takes long time to travel. Modes should cover road, Railways, Airways and important Waterway.

v. **Accommodation Facility:**

Accommodation facility such as names, address and location of various hotels, Lodges. Distance of this hotels from nearby tourists places. Fares of hotels, with different classes (5 star, 3 star)

This Hotels should be rated by the tourists.

vi. **Information of Guides:**

Different Guides with their contact information. The Guides should be government authorized and of different languages.

vii. **Tour Packages of Department to different tourists.**

viii. **Art, Culture & Entertainment**

ix. **History & Sports**

x. **Shopping & Events**

2. From Tourism Department Perspective :

- i. By making the app more and more effective, large number of people can be attracted towards the Kerala. Which will increase the revenue of tourism department.
