

## Thinking about kerala,we with you to plan;to guide,to enjoy

This mobile app is for whom want to know about kerala,want to plan trip to kerala,travelling through kerala.It will provide all facilites and ensure safe journey

1: Home page contains attractive pictures of kerala and small captions in sliding.Under that there is question “what do you want to see??” ,there is options like beaches, waterfalls, parks, houseboat,hills, etc .Each contains places like that in kerala with pictures and description about place, climate etc.she/he can mark”want to see”.

After press button 'show my trip to kerala' , app ask details like name,country and language for set preference for units like money,distance. She/he can see the whole trip destinations like in map. In short it will like trip plan with expence,no of days

She/he can edit it for increase days staying, choosing hotels etc. It will easy for planning.

2: Interst Button-By this she can find out who intersted to visit kerala from their nearby places so they can chat and travel as group .It decrease expense and more fun

3:- App include things she/he do for visa, things needed for traveling through kerala like kind of dress etc

4:- If she come to kerala, automatically create a log file in server about details ,places went,vechilcels hired for future referance incase she/he face problems or accused of terrorist. It can looked by authorised person only for ensuring privacy.

5:- Stay is important in a tour. They can select hotels according to budjet or star value. Each hotel has user ratings and review. Review has three columns : general, plus points, -points. This filled by other users. By this users can choose according to their desire and service providers can improve. Each user can review anything in kerala and other users can view this. Link to hotel are here and they can book rooms

6:- All things will save automatically in users tour planner. They can find out each days activity,time required etc easily

7:- Transportation is an important in tour. App show all routes and possible ways of transpotration. If she get it into an vechicle she takes picture of licence plate. Using 'ocr' it saves in app. This discourage abduction. App store which kind of vehicle and destination. After reaching destination app show charge(max). By this exploiting forgineers can avoid. If vehicle moves from desired route app shows user careful signal. So she can take precautions. If she didnt press “its ok” button app server automatically send alerts to local tourism incharge and he will check personly to ensure security. App contain timing of buses,trains,flights and Help is one button away..automatically forward to nearest helping tourist center using gps for safty of traveller.

8:- Buying products-app show where can buy products like 'aranmula kannady',fish fry and their routes and price and review. It economically help tourism sector and also free advertisement

6:- App has malayalam transalator. So communication esay. Just type in english or in their language it spaeaks malayalam. It mainly for destnation places,asking for help etc

8:- Nearby tourism places will show in app and distances and time needed.So this user can change plans if they have more time in one place. And user can review about app and recomend it to facebook friends by one button.
