

# Shake For Help

“Help” is a word always alert us from recent issues that reported in a frequent years from all over India. So we need to give more importance for the travellers that coming to out places as our guest. **We ensure the protection of each and every traveller that spending time in Kerala through this application.**

This is some utilities to ensure the protection of traveller including essential needs like **torch light** (flash light of camera), **emergency call**, **siren sounds and beacon light** etc.

**All above are very much in need utilities for every traveller so they need to toggle between apps to access all these for their requirements to fulfil (present condition using different apps).** Here we need to include these types of essential needs for perfect time in our app.

**Shaking is the technology we need to use here for the help.**

Everybody can easily use this shake facility to get all their stuff. A customizing option can provide to give more preference for utilities (<single shake for torch / emergency calling etc.> or <single shake to get all utilities in a menu for selecting each >). **We can add the emergency phone no. of police station nearby or hospitals etc.** Siren and torch will really helpful for the travellers who are in a trekking or remote place.
