

## ENTRY TO MOBILE APP IDEA COMPETITION

– By Midhun.K.V, midhun.kv@gmail.com, 9995525630

### **Voice Recognition**

The important feature of the app is that it supports both voice and touch navigation.

### **State Tour**

The state tour explores through important tourist places of Kerala.

### **District Tour**

The district tour explores through tourist places in each district of Kerala.

### **Search Engine**

It can be used to search any places in Kerala. It provides detailed description of each place such as history, geographical area information, languages used, religious information, STD Code, population figure, important tourist attractions, time zone, district capital, travel & transportation (airport, airplane, bus stop, bus, train station, ATMs, movie theatres, train, taxi stand, taxi), food and accommodation (hotel, hotel room, restaurant), emergency situations (police, officer, ambulance, hospital, doctor, pharmacy or drug store etc.

### **Offline Access**

The app will have a download data feature so that the app can be used in places where there is no internet access. User have to select and download data from each page. There will be a 'save this page' button below each web page.

### **Events**

The events page will list both the religious and famous events. It will highlight its date and location of important poorams, temple festivals, church festivals etc.

### **Language Translator with Text to Speech feature**

This offline feature will help translate any language to Malayalam and user can hear its pronunciation.

### **GPS Navigation**

Current location of the user and its route to the destination. Near Me feature helps to identify nearby hotspots.

### **Social Media Status**

Integrated with Facebook, Twitter and Email for you to share updates and tweets about your Kerala trip.

### **Tour Planner**

Helps you plan your trip with the 'tour planner' and share it with friends and family.

### **WishList**

Wishlist helps to add places to wishlist so that user can bookmark his favorite spots.

### **360 Degree Virtual Tours**

This feature helps to navigate 360 degree panoramic images of important destinations.
