

Find Way Out

The idea is to find out Taxi or Auto wherever you are in based on your current location. Sometimes it is tough to get Auto's like transport in some places. In that case we can go for this app.

We assume that all the Auto Drivers with their vehicle details are already registered through the app. So that it will be displayed in the app and user is provided with the option to call them according to their availability.

The idea is simple. But it will very effective for day today life. Also people who are new to the city doesn't know the details about Auto and all. So this will be effective one.
