

## **A virtual escort- for anything, anywhere, anytime**

This is an application to find out the tourists needs and wants from his current geographical position and plans his trips in seconds.

While the application is loaded, the home page should highlight his current geographical location in a map. At the same time it shows some basic menus around the highlighted region like- 'auto navigation'(to find out nearest tourist attraction and also we have provided an option for manual search for a tourist location ),road route, transportation options nearby(nearby bus/rail/flight/cab stations),hotels, restaurants, banks, ATM, hospitals ,money exchanges etc.

While swiping manually on the map, highlight each tourist destinations in the newly loaded map segment with road map to each highlighted location from current location. And highlighted location is notified with a small message balloon showing its most attractive feature.

When double tapping on a highlighted location icon, show different menu options around the location. The menu must provide the options to explore the destination in the many ways like (1) 360 degree view of all famous tourist attraction on that selected location, (2) well presented video/audio description about that place, (3) Option to see detailed textual description with photos(4) must show climate conditions .

More than this the menu should provide following categories – (1) Resorts(room types, tariffs, availability, booking/reservation option, locale etc.), (2)Transportation(nearby stations: bus-nearby stand, reservation option, train-nearby railway stations, train details and timings, flight-airport, flight timings, cab-provide phone numbers for booking, also the application should suggest most cost effective and suitable way among the above to reach the selected location.,(3)Nearby restaurants-Phone number, attractive food items etc.,(4) Bank-all bank branches details nearby, ATM counters, money exchanges etc.(5)Other emergency details like hospitals, police stations etc.,

So with this mobile app the foreigners can easily explore and travel throughout our state without any other help from external sources.
