

APP NAME:KERALA TOURISM

The app should consists of 5 **Labels or Buttons**:

Label1:*About this app*: Brief description about how this app is useful for tourists.

Label2:*Tourist places/spots in kerala*:It should contain *all tourist places in kerala* as *sub-labels*.Whenever a person clicked on a particular sub-label i.e. a particular place,then it should display brief formation about what is the greatness of that tourist place,what kind of pleasure,excitement,enjoyment that tourists get,best time in a year to visit this place,expenses for that particular tourist place excluding food,accomdation and other expenses(i.e.Expenses for only that tourist place).

LABEL3:*Tourist Packages*: It should conatin *different types of tourist packages as sub-labels*, brief description about the packages and their price,advance booking option for packages should be provided.

LABEL4:Gallery containing sample photos,videos of each tourist spot.

LABEL5:A label which contains list of best hotels available with *5 sub-labels:economy scale hotels,mid scale hotels and luxury hotels*.(This sub-labels are based on rent charged and kind of facilities offered by the hotels,economy scale:hotels with low rent and all basic facilities,Mid scale:Hotels with moderate rent and some additional facilities compared to economy scale i.e. exceeding all basic facilities needed, *Luxury*: with high rent and luxury facilities.).All the above *5 sub-labels* should contain the list of hotels.(According to the rent and facilities offered by the hotels,the hotels will be included in their respective sub-label i.e. *economy or mid scale or luxury scale*).So,when a particular hotel is clicked it should provide facility for advance booking in that hotel by taking inputs from customer like how days & nights they want to stay,food required or just staying,etc.If providing this booking facility within the app is very complicated then atleast when a particular hotel is clicked it should directly navigate to the hotel website where bookings are done in that hotel website.

LABEL4:It should contain helpline numbers,feedback and suggestions from customers.

THANK YOU FOR GIVING ME OPPORTUNITY TO PARTICIPATE IN THIS GREAT EVENT.
