

Kerala tourism app idea:

Group alarm/gps based reminder:

- Create group like for app users.
- One person sets alarm in group it gets set in all other person of group.
- It can also be done location wise
 - o Set reminder for particular location as soon as user reach at that location alarm rings.

Special offers based on gps:

- Give some offers or discounts to user in hotels, resorts, beach views.
- Record users life events date and if user is in Kerala on that date treat as per to make it special so it attracts them.

Track user map service:

- Provide accurate map for all streets.
- set start position by user
 - o Example: start point is hotel user starts walking through hotel ; this system tracks user and makes mark on map as distance covered by user so it becomes easy for user to return back.

Normal functionality:

- Registration, login, tickets booking.
- Notifications for special events to user in nearby location.
- Hotels , restraunts and various places information with photos
 - o Categorize it as per user ratings, price based and star based.
- App size also an important factor for users.
- Details about important places to visit with pictures.
- Multiple language support.
