

## **Travel companion and personal advisor for travellers visitors or planning to visit Kerala.**

The app will improve the travellers experience, productivity and security. Since people chooses destinations based on these factors, no of visitors will increase dramatically benefitting Kerala Tourism.

**Plan My Trip:** Users can give number of days of the trip, main location and their interests. App will suggest the locations accordingly. For eg, if user is planning for 2 days trip with main location as Munnar and his interest is to visit honeymoon spots, app should suggest the appropriate locations, route suggestions and fare estimates.

**Book My Trip:** The best itineraries and lodging booking should be suggested to user based on his requirements like source, destination, place of stay, no of people.

**Deals and Discounts:** All current deals and discounts should be displayed based on user inputs like shopping, restaurant, lodging, taxis and so on.

**Security:** User should be able to record the information which are required for security. For eg, if user gets into a taxi, he should be able to record the taxi no, drives license no, source and destination. This feature will help the police to track the traveler if he is missing. Also, when the user asks the driver or hotel details, they will get alerted since their identity is tracked.

Emergency contact details and emergency dial button should be there.

**Where Am I:** The user should see where he is, nearby tourist spots, restaurants, lodges and hospitals with distance and fares.

**Share reviews and experience:** Users can vote and review places, lodges etc, share their experience and photos even publish in social media apps like facebook and twitter.

**Complaints:** Users can enter their complaints.

**Download:** There can be a download button wherever possible to enable the user to view them in offline.
