

GPS Based Location Reminder

The mobile app will be connected with GPS service and whenever a tourist passes through certain location the app will automatically remind the importance of that location such as Tourist places nearby, Famous Personalities from that location and their contributions to the society etc. For example lets assume that a tourist from Cochin International Airport goes to visit Munnar. Assume the way as Nedumbassery – Kalady – Perumbavoor – Moonnar. When the tourist steps down from the airport the app will show a message that “Nayathodu - Birth Place of Sree G.Sankarakurup, Njnapeedham award winner, Famous work – Odakkuzal” and as on moves forward and the tourist reaches Kalady the app again shows the message “1) Kalady – Birth Place of Jagat Guru Sree Adi Shankaracharya, Adwaita Philosopher, Famous work – Soundarya Lahari. 2) Nearby tourist location – 10kms to Malayattoor Pilgrim Center and Mulamkuzhi Gardens 3) Visitors Attraction – Adi Shankara Keerthysthambha Mandapam, Sanskrit University and Adwaita Ashramam” Like this the app will show messages according to the location of the tourist. Since the app is already linked with GPS the route and kilometers to the destination can be also displayed on the screen. If the tourist selects any nearby location name from the given message app can display the route to that specific location and back to the final destination. It will be useful for all tourists and they can also visit all these places if time allows.
